## PROFESSIONAL SUMMARY

Aspiring Software Developer with a strong passion for building practical and impactful software solutions. Hands-on experience in developing and deploying full-stack web applications, with a strong focus on problem-solving, clean code, and creating intuitive user experiences. Eager to contribute to a dynamic and collaborative team while continuously learning and applying new technologies. Seeking an entry-level Software Engineer / SDE role to grow as a developer and contribute to real-world projects.

## EDUCATION

|                                                                                            |             |
|--------------------------------------------------------------------------------------------|-------------|
| Narula Institute of Technology — B. Tech, Information Technology · MAKAUT · CGPA: - 7.9/10 | 2022 – 2026 |
| Ling Liang High School — Class XII (ISC) · 72%                                             | 2021 – 2022 |
| Ling Liang High School — Class X (ICSE) · 89%                                              | 2019 – 2020 |

## SKILLS

**Technical Skills:** Java, C, C++, SQL

**Web Development:** HTML5, CSS3, React.js, Vite, JS, Tailwind CSS, Node.js, Express.js, RESTful API design,

**Databases:** MongoDB, MySQL, PostgreSQL (Basics)

**Tools & Platforms:** Git, GitHub, Postman, Vercel, Render, AI Tools, Clerk Auth,

**Soft Skills:** Problem Solving, Time Management, Team Collaboration, Quick Learning, Attention to Detail

## PROJECTS

### FarmDrop — Full-Stack Grocery & Farm-Produce Delivery Platform 2026

*React, TypeScript, Vite, Tailwind CSS, Node.js, Express, PostgreSQL · Deployed on Vercel*

- Built a full-stack grocery e-commerce platform with customer, admin, and delivery-partner portals, role-based dashboards, order management, live delivery tracking, and a shared Prisma/PostgreSQL data layer.
- Developed a responsive UI system with light/dark themes, modern glass morphism styling, reusable components, and mobile-first layouts across 15+ screens and components.
- Implemented core e-commerce features including product search, cart management, address handling, multi-step checkout, delivery OTP verification, order tracking, and live delivery location updates.

Live Link: <https://farm-drop-delivery.vercel.app>

### AgentForge — Autonomous AI Agent Orchestration Platform 2026

*React, Node.js, TypeScript, MongoDB, OpenRouter AI API*

- Engineered an autonomous AI agent platform for intelligent task planning, multi-agent orchestration, tool execution, memory, verification, and self-correction.
- Implemented persistent task workflows with agent routing, human-in-the-loop approvals, model fallbacks, artifact generation, scheduling, and secure role-based access control.
- Built real-time task monitoring and recovery workflows with detailed execution logs and status tracking.

### Connectra — Real-Time Social Media Platform 2026

*MERN, Clerk, SSE, ImageKit, Inngest, Vercel*

- Engineered a real-time messaging system using Server-Sent Events (SSE), enabling instant message delivery and efficient event streaming between connected users.
- Added Inngest for background job processing and implemented 24-hour auto-expiring Stories, ensuring reliable scheduling and management.
- Built a responsive social networking experience with user profiles, connections, posts, media sharing, and personalized content feeds using React and Redux.

## CERTIFICATIONS & COMPETITIONS

- Skyscanner Front-End Virtual Experience — Forage (Aug 2025)
- Accenture Nordics Software Engineering Job Simulation — Forage (Aug 2025)
- Java and OOP Concepts — Skillsoft, Infosys Springboard (Aug 2025)
- Online Competitions (Unstop): Hacker's Premier League 2026, EY Techathon 6.0, SEED Hackathon 2025
